# Step 2

Cut out the pattern templates. It may be helpful to pin the paper templates to the felt, or you can just hold them in place and cut around.

Mark these lines with a pen or pencil.

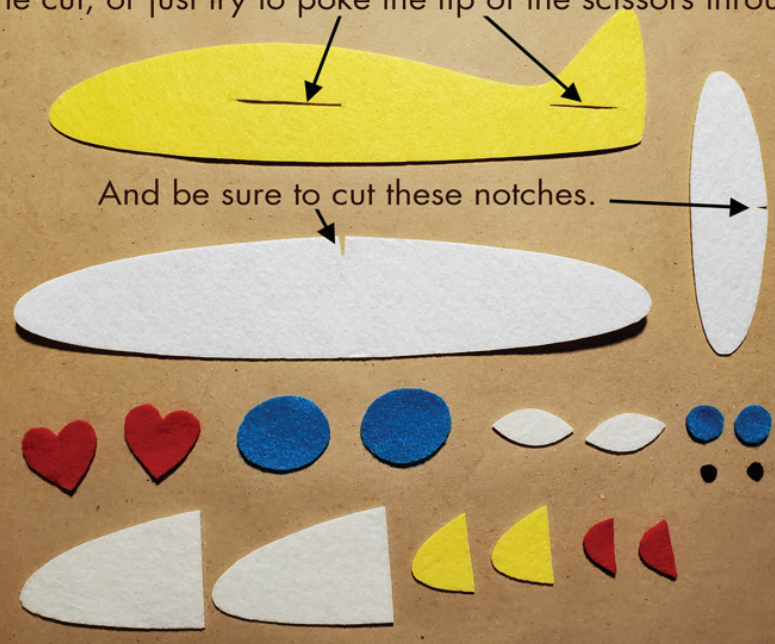

# Step 3

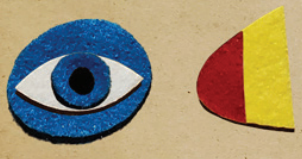

Cut out the felt pieces.

To make these slots, you can fold the felt slightly to start the cut, or just try to poke the tip of the scissors through.

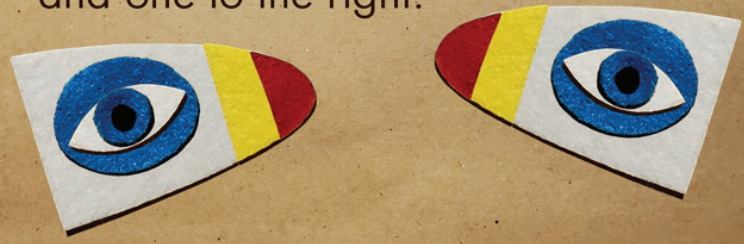

# Step 4

Glue the eye and nose pieces together (2 sets of each), then glue them to the 2 face pieces.

You can use the craft stick to spread the glue.

!!! Be sure that one face points to the left and one to the right.

## Step 5

Glue the finished faces to the plane body, one on each side.  
Glue the hearts on, too.

Glue these to the other side.

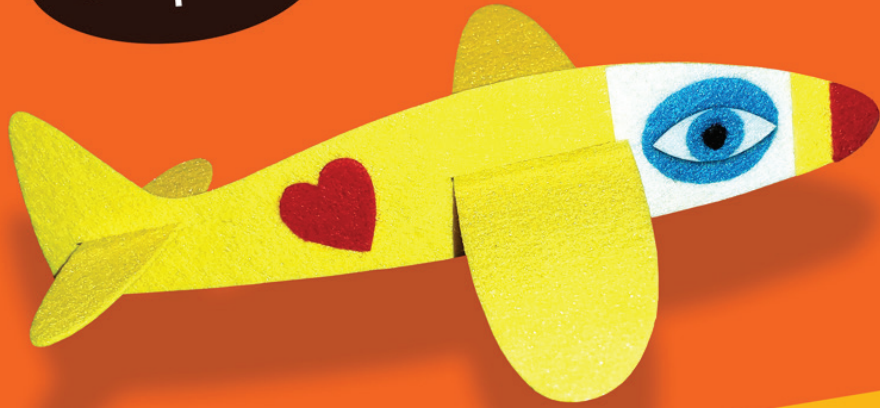

## Step 6

Fit the wing and tail pieces into the slots on the plane body and push to the center. Slide forward a little at the notches to secure in place.

Step 7

*Ready to fly!!!*
