

Step One

Download pattern at <https://bit.ly/3onfmza>

Step Two

Cut out the pattern parts and attach them to the corresponding color felt sheets. You will be cutting around them. You can pin down the larger pieces, but the smaller ones (like the little circles) you will need to hold in place to cut around.

Cut out the mask patterns and pin them to the black felt sheet. Cut around the outside of the shapes, then cut out the eyes.

For the eyes, fold the felt slightly and snip into it to start the cut.

Step Three

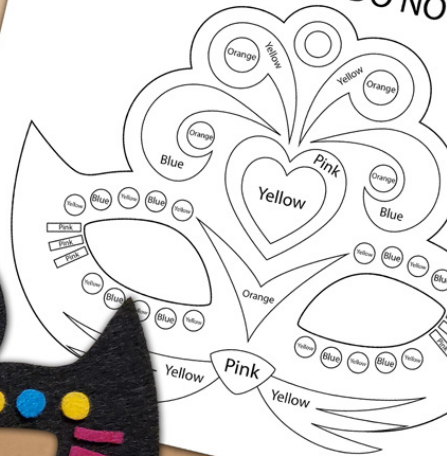

Now you're ready to glue it all together!

Refer to the reference sheet included in the pattern download to position the decorative pieces on the mask surface.

For reference only—DO NOT

Glue everything down. It may be helpful to use the craft stick to spread glue on the pieces.

Step Four

Flip over the mask and glue on the mask back. This step is for stiffening the mask so it doesn't flop over when you hold it up.

Be sure to carefully line up the two pieces so the edges match.

Step Five

Attach the dowel rod.

(Cut felt in this shape and peel off back.)

LET DRY!

This will make it extra secure.
