STEP 1

Use the pattern sheets to cut out the felt pieces.

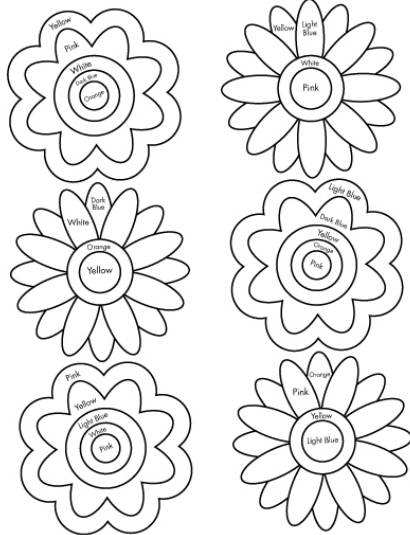

If you are using the art kit provided by SMART, try to follow the arrangement of shapes laid out on each pattern sheet when you are cutting out the pieces, especially for the green leaves. This will help make sure that you have enough felt. You can use straight pins to secure the pattern paper to the felt.

STEP 2

Use the reference sheet included with the patterns to organize your cut-out felt pieces into the 6 different flower groups. As you begin to sew, it will be helpful to keep each flower set together.

For Reference Only. DO NOT CUT OUT.

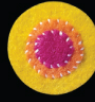

As you begin to sew, it will be helpful to keep each flower set together.

Note that there are 2 basic flower types (and 3 of each type): Type 1 are those with rounded petals and type 2 are those with long thin petals. The rounded flowers have larger center pieces made of 3 concentric circles. The flowers with long petals have smaller center pieces made of 2 circles.

STEP
3

Start to sew!

1. For each flower, sew the front center pieces together. Use the white thread.

Center of rounded flower
(made of 3 circles)

Center of long-petal flower
(made of 2 circles)

2. Sew the dark green circles onto the light green circles. Use the green thread. These will be the back center pieces of the flowers.

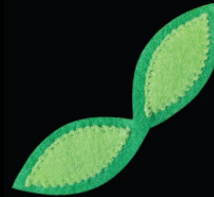

Larger circles

Note: There are 2 sizes each of light green and dark green circles. The larger of each go together and the smaller of each go together.

Smaller circles

3. Sew the light green centers onto the dark green leaves. Use the green thread.

STEP
4

Attach the flowers to the yarn.

The same steps will apply to both types of flower. You will be attaching alternate types of the flowers approximately 6 inches apart from each other.

1. Each flower has 2 layers of petals. The back layer will be attached to the yarn first. Lay the yarn across the middle of the petal layer and sew it down in the center using several small stitches of the green thread.

2. For the front of the flower, align the top layer of petals on top of the bottom layer, then position the center piece. You may want to pin all the pieces together. You will be sewing down the center circle through the 2 petal layers. Sew around the outer edge of the center piece using small stitches of the white thread. Leave the petals loose.

3. For the back of the flower, position the green circle (bigger circle for rounded flowers; smaller circle for long-petal flowers) in the center. You will be sewing down this piece, but only through the back layer of petals (so that the stitches won't show through on the front). Use the green thread.

STEP

5

Attach the leaves.

You will be attaching one of the leaf pieces between each pair of flowers.

Center the leaf piece across the yarn and hold it in place. Using the green thread, sew up through the yarn and the felt of the leaf, then wrap the thread around several times to secure it. Tie a knot in the back.

STEP

6

Finish the ends.

Tie a loop at the top end of the yarn.

Thread a bead on the bottom end. You can use a straightened paperclip or anything similar to poke the yarn through. Tie a knot below the bead.
